Jl. Brawijaya Gg. Makning No.4 Rt. 03 Rw. 03 Kelurahan Kebalenan Kecamatan Banyuwangi

Fresh graduate with a Bachelor of Applied Science (D4) in Software Engineering Technology from Politeknik Negeri Banyuwangi, with experience in web and mobile application development through Project-Based Learning (PBL), internships, academic projects, and freelance work. Proficient in Laravel, MySQL, and Flutter, with a strong foundation in networking supported by MTCNA and BNSP Junior Network Administrator certifications. Developed a digital village website and an internship registration and participant management system during internships, as well as various freelance projects through IjenDev.id. Adaptable, collaborative, and capable of taking on different roles based on project requirements.

Work Experiences

Cv Eksa Reka Cipta - **Banyuwangi, Indonesia** Mar 2025 - Jun 2025

Intership

CV Eksa Reka Cipta is a technology company focused on developing information technology solutions, including web and application development to support clients' digital needs.

- Developed a digital village website based on project requirements.
- Designed and implemented the website interface and required features.
- Managed and integrated data required for the website.
- Conducted testing and debugging to ensure features functioned properly.
- Worked independently under the guidance of a project supervisor throughout the development process.
- Successfully contributed to the development of a digital village website during the internship.
- Applied web development skills to a real-world project based on client requirements.
- Successfully completed development tasks and feature customizations according to project needs.

Dinas Komunikasi dan Informatika - **Banyuwangi, Indonesia** Jul 2025 - Dec 2025

Intership

The Department of Communication, Informatics, and Encryption (Dinas Komunikasi, Informatika, dan Persandian) is a government institution responsible for managing communication and utilizing information technology to support public services and government operations.

- Developed a digital village website based on provided requirements and information.
- Developed an internship registration and participant management website to support the internship administration process.
- Designed and implemented website interfaces and features based on project requirements.
- Managed and customized data and content displayed on the websites.
- Conducted testing and debugging to ensure the websites functioned properly.
- Coordinated with relevant stakeholders throughout the development process.
- Led the team in task distribution and coordinated project development activities.
- Successfully developed a digital village website and an internship registration and participant management system during the internship.
- Successfully coordinated team task distribution and project development activities.
- Completed website development according to the specified requirements.
- Applied web development skills in a real-world government environment to support the digitalization of information and administrative processes.

IjenDev.id - **Banyuwangi, Indonesia** Mar 2025 - Present

Freelancer

Ijen Developer Indonesia (IjenDev.id) is a software house focused on developing digital solutions across web, mobile, desktop, IoT, and digital marketing.

- Developed and maintained web-based application interfaces according to project requirements.
- Translated designs and feature requirements into functional interfaces using appropriate technologies.
- Collaborated with team members throughout the development and completion of projects.
- Assisted with back-end development when needed to support the team.
- Implemented improvements and feature adjustments based on project requirements.
- Contributed to the completion of various digital projects through front-end development.
- Adapted to different project requirements and took on additional responsibilities beyond front-end development when needed.
- Assisted the team in resolving back-end development challenges on selected projects.

Education Level

SMK Negeri 1 Glagah Banyuwangi - Banyuwangi, Indonesia

Vocational High School Computer and Network Engineering, 84.54/100.00

- Built a strong foundation in Computer and Network Engineering through hands-on practice with MikroTik, Cisco Packet Tracer, TP-Link devices, and basic network installation.
- Maintained a Top 10 ranking throughout 3 years of vocational high school and achieved 2nd place in the final year.
- Earned the MTCNA (MikroTik Certified Network Associate) certification during my studies, demonstrating foundational knowledge of MikroTik networking technologies.
- Applied networking knowledge through practical activities, including basic network configuration, device setup, and RJ45 cable crimping.

Politeknik Negeri Banyuwangi - Banywuangi, Indonesia

Diploma in Software Engineering Technology, 3.72/4.00

- Completed a 4-year Diploma 4 (D4) program in Software Engineering Technology with a GPA of 3.72/4.00, focusing on web and mobile application development.
- Applied the software development lifecycle—including requirements analysis, system design, development, testing, and maintenance—through academic projects, Project-Based Learning (PBL), internships, and freelance projects.
- Developed 5+ web and mobile projects, including a laundry management system, surfboard rental system, crab farming management system, RPS and course learning outcome management prototype, and an inventory application for PLN UP3 Banyuwangi.
- Served as Team Lead for the PBL Laundry Management System, coordinating task distribution and development activities for the project team.
- Gained practical industry experience through internships and freelance projects, developing digital village websites, an internship registration and participant management system, and various client websites.
- Participated in 3 student organizations, including Robotics, E-Sports, and Badminton, and contributed as a PKKMB Logistics Committee Member.

Organisational Experience

Panitia PKKMB Sie Perlengkapan - Banyuwangi, Indonesai — Jul 2023 - Aug 2023

Member

PKKMB (Introduction to Campus Life for New Students) is an annual university orientation program designed to introduce new students to the academic environment, campus facilities, student organizations, and university life. The event is organized by students and university staff to support the transition of new students into campus life.

- Prepared and ensured the availability of equipment and supplies required throughout the PKKMB event.
- Managed the distribution and collection of event equipment, including walkie-talkies and other communication devices.
- Responded to equipment requests from other committees and ensured their needs were fulfilled during the event.
- Coordinated with other committee members to support the smooth distribution, use, and return of event equipment.
- Supported the successful execution of the event by maintaining the availability of essential equipment and communication devices.

UKM Robotika - Banyuwangi, Indonesia — Mar 2023 - Mar 2024

Member

The Robotics Student Organization is a student community focused on learning and developing skills in robotics, electronics, Arduino, and Internet of Things (IoT) through hands-on activities and practical projects.

- Participated in robotics and Internet of Things (IoT) activities, gaining foundational knowledge of robotics and embedded systems.
- Learned to use Arduino to control electronic components and simple devices.
- Built and tested basic Arduino-based projects, including indicator light controls and simple robotic devices.
- Collaborated with fellow members in designing, assembling, and testing robotics projects.

Skills, Achievements & Other Experience

- **Web Development**: Developed and maintained web applications using Laravel, PHP, MySQL, Bootstrap, HTML, CSS, and JavaScript through academic, internship, and freelance projects. Experienced in implementing interfaces, business logic, database integration, authentication, and application features.
- **Mobile Development** (2026): Developed cross-platform mobile applications using Flutter and Dart, including an inventory application for PLN UP3 Banyuwangi with offline data support and synchronization capabilities.
- **Full-Stack Development**: Developed full-stack applications by integrating front-end interfaces, back-end services, databases, and APIs. Experienced in using Laravel, PHP, MySQL, Flutter, SQLite, and third-party APIs across various projects.
- **Application Development**: Developed and contributed to various applications, including a PLN substation inventory system, laundry management system, internship participant management system, village digitalization website, and student registration website.
- **Project Leadership**: Served as Team Lead for a Project-Based Learning (PBL) project, coordinating task distribution and development activities to ensure the project was completed according to requirements.
- **Networking**: Gained practical networking experience with MikroTik, Cisco Packet Tracer, TP-Link devices, basic network installation, and network configuration, supported by MTCNA and BNSP Junior Network Administrator certifications.
